

What is the Student Activity Group's core activity? What else do you aim to do?

The group will mainly play chess among themselves but we will occasionally host tournaments against other clubs. The chess club will provide an opportunity for chess enthusiasts at kcl to meet and socialise. There will also be the teaching of chess.

How are you going to achieve the above?

By advertising until I acquire a reasonable number of members. We will then purchase chess boards and begin playing chess while simultaneously recruiting new members.

How will you measure whether you have met your aims or not?

By the number of persons who attend meetings and actively participate in club activities.

Which existing Student Activity Groups are you most similar to or likely to overlap with?

none

How will you go about recruiting students to your Student Activity Group?

Through posters on the campuses and in the halls of residence with contact information and by asking my friends to help.

Is your activity accessible to all students including international students and those with disabilities?

yes

What will your group bring to the KCLSU community? Why should we support and fund you?

It will bring an opportunity for kcl to gain good publicity when the club wins tournaments and the KCLSU community will benefit by being able to include a fraction of the student community that has so far been neglected.

What are your long term hopes for the group, if any? How do you plan to ensure the group continues successfully?

I hope that the kcl chess club will survive as long as the college does. I plan to ensure this by instilling a sense of pride and duty in the younger members and by grooming them for future leadership of the club.
