Anya is the President of KCL STAR (Student Action for Refugees)
Here are her reflections on the Project she was involved in.

The society aims to help students who are from refugee or forced migrant backgrounds. They work with local colleges to help students from this particular background.

The students run their own sessions on Study skills, interview skills, UCAS, personal statements and CVs. They ran some field trips to the Houses of Parliament and around Kings campuses. Their project got them recognition by the national Student Action for Asylum Seekers and Refugees society.

They run an additional homework club for 30 students who are from forced displaced backgrounds to assist them with any issues they are having with their homework and need additional help with it.

By doing a WP project you impact surrounding communities who may not have had to opportunities you have had and grow as a person yourself.

Anya.

Below is some feedback the project has had.

One student said they will now try to go to university after seeing it was cool. Another student stated he will one day attend King’s.
